SUMMARY

Game Developer with an interest in both game design and technical development. Experienced with Unity and C#, with a focus on gameplay programming, UI development and interactive systems. Passionate about combining technical problem-solving with creative design to build engaging player experiences.

EDUCATION

B.Tech in CSE with specialization in Gaming Technology, SRM KTR, Chennai — 2023 - Present

Class XII, Delhi Public School, Dehradun — 90.6%

Class X, Delhi Public School, Dehradun — 88.2%

EXPERIENCE

Unity UI Developer Intern — Nov 2025 - Jan 2026
Petals Studio — *Remote*

- Built and shipped player-facing UI for *Melee Madness*, now live on Google Play, using Unity UI Toolkit with UXML for layouts and USS for styling.
- Made the profile, shop and achievements screens from first layout all the way to release, and a few pop-ups.
- Connected the screens with smooth navigation so players can move between menus easily.

Board Member — Oct 2023 - Oct 2026
Next Tech Lab, SRM KTR — *Chennai, India*

- Ran the club's recruitment process and supported day-to-day administration.
- Helped organize and host game jams and talks on game design and development.

PROJECTS

CAD 2.0 - Chemistry VR Learning Tool. Teamed up to build a Unity VR tool in 36 hours that makes basic chemistry fun for higher elementary students. Made the custom shaders for the water, land, life and sun spheres, which turn into their element when thrown up or down. (GitHub)

Boris The Bartender (Dec 2024). Made a story-driven bartending game inspired by *Bartender: The Right Mix*. Programmed the dialogue system and drink brewing, plus a suspicion meter that goes up when you serve the wrong drink or take too long, so customers react to how you play. (Play it here)

Loop Speedway (Aug 2023). Made in a two-day game jam on the theme "Loop". Programmed the car controls, a scoring system based on how long you survive, and a meteor spawner that keeps the challenge going. (Play it here)

SKILLS

Game Development	Unity 2D & 3D, C#, Unity UI Toolkit (UXML, USS), Gameplay Programming
Game Design	Gameplay Design, Level Design, Narrative Design, Rapid Prototyping
Technical	GitHub, Shaders (Unity Shader Graph) & Visual Effects
Audio	FL Studio, Ableton

ACHIEVEMENTS

- Won 1st Place at the CAD 2.0 hackathon hosted by Coding Ninjas 10x SRM.
